Q&A with CNI's Clifford Lynch: Time to re-think the institutional repository?

Seventeen years ago 25 people gathered in Santa Fe, New Mexico, to discuss ways in which the growing number of e-print servers and digital repositories could be made interoperable.

As scholarly archives and repositories had begun to proliferate a number of issues had arisen. There was a concern, for instance, that archives would needlessly replicate each other's content, and that users would have to learn multiple interfaces in order to use them.

It was therefore felt there was a need to develop tools and protocols that would allow repositories to copy content from each other and to work in concert on a distributed basis

With this aim in mind those attending the New Mexico event dubbed the Santa Fe

COAR counters reports of repositories' demise

Guest post by Kathleen Shearer, Executive Director, COAR

"The reports of our death have been greatly exaggerated" (to paraphrase Mark Twain)

Last week COAR published a response to an article written by Richard Poynder on September 22, 2016. Although some of Richard Poynder's comments definitely reflect the current reality,

he made a number of other somewhat questionable assertions, in particular that institutional repositories (IRs) have failed.

Poynder's comments reflect a creeping narrative entering into the dialogue about Open Access. This narrative portrays repositories as obsolete, dead, and with very little support from the community. Yet this picture, propagated by a few loud voices in the community, is in contradiction with my experiences. In the last several months I have been traveling

論点

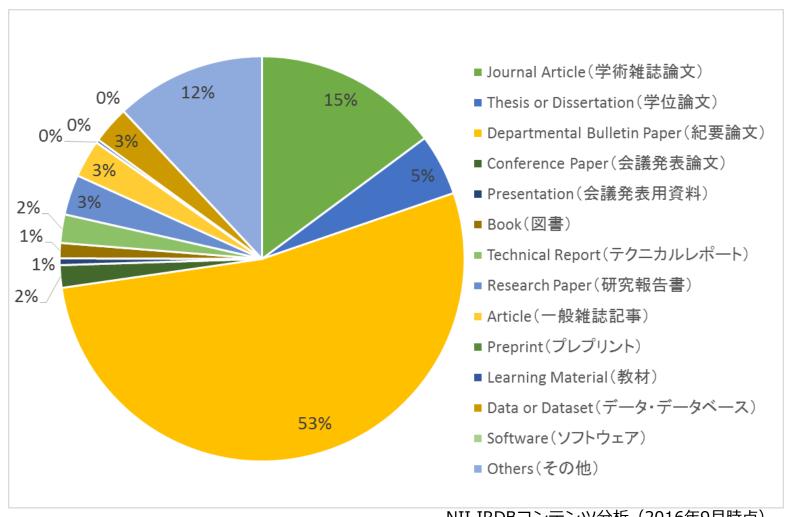

Poynder

- 機関リポジトリは行き詰った
- グリーンOAの目的を達成していない
- 研究者はセルフアーカイブしない
- 営利出版社に乗っ取られるおそれあり

Shearer

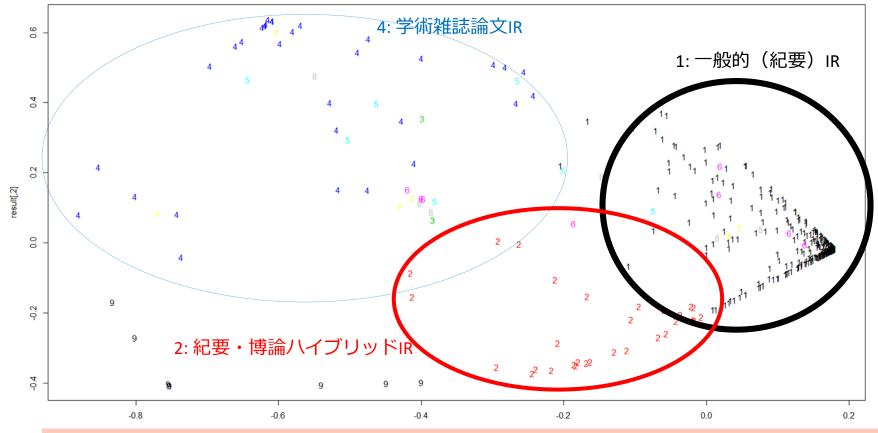

- 機関リポジトリのネットワークは世界的に拡大している
- 分散型のリポジトリの方が買収されにくい
- ポテンシャルを十分に発揮すれば学術コミュニケーションの革新につながる

日本のリポジトリのコンテンツ

国内IRマッピング

階層クラスタリングと多次元尺度更生法による2次元マッピング

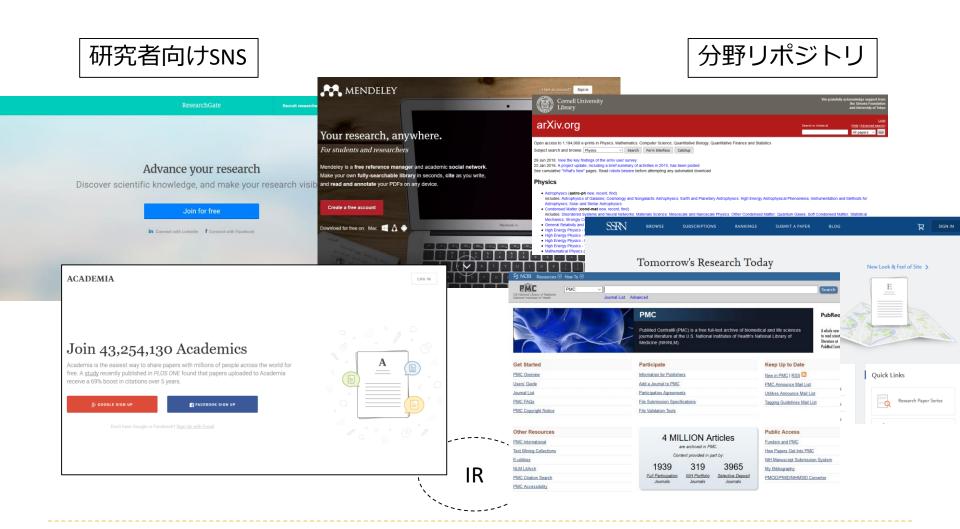

1:一般的(紀要)IR 2:紀要・博論ハイブリッドIR 3:データIR 4:学術雑誌論文IR 5:一般雑誌論文IR 6:書籍IR 7:リサーチペーパーIR 8:テクニカルレポートIR 9:学位IR

前田朗氏(東京大学)提供

日本のリポジトリの総括

- 1. グリーンOAの受け皿としては機能していない。
- 2. 紀要・学位論文リポジトリ。

研究者と機関リポジトリ

紀要・学位論文リポジトリ

"The role of an IR should be to expand and diversify the existing scholarly publishing system by providing access and stewardship for material that mainly falls outside of the traditional scholarly publishing system." (Clifford Lynch)

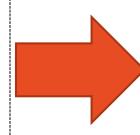

日本の機関リポジトリは 正しくこの役割を果たしているのではないか

JPCOARへの期待

日本のリポジトリのポテンシャル

- 700のリポジトリと180万 件のコンテンツ
- junii2、IRDB
- JAIRO Cloud
- データ管理基盤?
- コミュニティ(DRF、地域、JCユーザグループ)

次世代リポジトリ 理念の再構築と実践
